Experience

Strada

Quality Assurance & Compliance Senior Associate

Quezon, Manila
July 2024 – Present

- Conduct manual testing of new features for a payroll system integrated with SAP, ensuring functionality, usability, and compliance with business requirements.
- Design and execute test cases, test plans, and test scenarios to validate system functionality and performance.
- Identify, report, and track bugs using ADO, ensuring timely resolution and improved software quality.
- Perform end-to-end testing of payroll and HRMS modules, including integration testing with SAP systems.
- Contribute to the continuous improvement of QA processes by implementing best practices for both manual and automated testing.
- Develop and maintain automation test scripts for an HRMS platform using Selenium Robot Framework.

Key Achievements:

- Refactored failing automation scripts, improving the test suite's passing rate from 10% to 90%, enhancing reliability and efficiency of the testing process.
- Optimized automation scripts, reducing execution time by 70%, significantly improving testing efficiency and enabling faster feedback cycles.

Infor

Software Quality Assurance Analyst, Associate

Taguig, Manila
September 2021 – June 2024

- Served as Quality Assurance Analyst for an e-commerce and Product Information Management (PIM) system, ensuring product quality and reliability through rigorous testing processes within a SCRUM Agile methodology.
- Developed comprehensive test cases for high-quality feature delivery, ensuring sufficient coverage and proper documentation in Zephyr Scale.
- Maintained stable and efficient automated test scripts using Selenium Robot Framework, adhering to best practices.
- Bug reporting and investigation with properly detailed documentation for newly developed features using Jira.
- Conducted manual and automated testing, including smoke, regression, sanity, load, and production testing.
- Assisted customers with production issues and conducted in-depth investigation of reported bugs.

Business Analyst

October 2022 - Present

- Acted as the standing product owner role for the team, driving product development and roadmap.
- Developed comprehensive requirements for new features, ensuring alignment with business objectives.
- Recorded release training videos to facilitate seamless adoption of new product updates.
- Assisted customers with product concerns, providing prompt and effective resolutions.

Key Achievements:

- Started the initiative to refactor and update the RF Automation Scripts to use every release testing.
- Volunteered as the standing Product Owner for the team, engaging in both QA and BA tasks.
- CY 2023 Q1 MVP

Gleent, Inc.

Quality Assurance Intern

Cabuyao, Laguna
June 2019 – July 2019

- Created and carried out test cases and test case scenarios for the company's top prioritized project.
- Critical analysis and examined work in progress websites to improve user experience.
- Created and revised prototype pages for ongoing projects.
- Received a Resourceful Intern Award from the HR department.

Key Achievement: Launched a sample website using Amazon Web Services for the company pilot project.
